Instructions for Actualise Round

- In Actualise we are looking for simulation based solutions.
- If your project idea is about designing an App, then you must submit a full-fledged working App and also submit its working demonstration.
- If your idea is about developing AI/ Machine Learning based algorithm/software for a particular application then you should be able to demonstrate the working of your application using a video.
- If your idea involves developing hardware then you should be able to demonstrate it using simulation results in a pseudo real environment or using 3D CAD design etc.
- If your idea is about building a supply chain then you should be able to demonstrate the complete business model, your value proposition and your USPs
- The submission form for Actualise will be available on the NOVATE+ 2020 website before May 30.
- Submissions for Actualise are due by June 7, 2020.
